

# RIYAZ HUSSAIN

React Developer

Address: Maharashtra

Phone +919156108140

E-mail: riyazsrh1999@gmail.com

1.6+ years experienced React Developer with hands-on experience in web-based user interactions along with designing & implementing highly-responsive user interface components by deploying React concepts. Proficient in translating designs & wireframes into high-quality code, and writing application interface code via Javascript and ReactJS workflows.

## Education

### Bachelor of Computer Application (BCA)

Swami Ramanand Teerth Marathwada University, Nanded, , Maharashtra

08/2021

Graduated Final Percentage : 77.11%

## certificates

HTML5, CSS3, JavaScript, React Js

## Technical Skills

### Languages

- |                |                    |
|----------------|--------------------|
| ● JavaScript   | React.js           |
| ● TypeScript   | React hook         |
| ● HTML5        | Redux              |
| ● CSS          | NPM                |
| ● Bootstrap    | Development tools: |
| ● Material UI  | Git, GitHub        |
| ● Es6-features | Jira, Bitbucket    |

## Work History

2021/07 - current

### Software Engineer

Unistar Softech Pvt Ltd, Pune, Maharashtra

#### UI Components Designing & Application Interface Coding

- Identified web-based user interactions and developed highly-responsive user interface components via React concepts
- Translated **designs & wireframes** into high-quality code and wrote application **interface code** via **Javsacript** following **React.js workflows**

#### Code Debugging & Front-end Architecture

- Troubleshoot **interface software** and **debugged application codes** to improve functionality and performance by 50%
- Developed and implemented **front-end architecture** to support user interface concepts with **100% accuracy**

#### Performance Optimization & Features Development

- Monitored and improved **front-end performance by 15%** and documented application changes & worked or **updates**

**Webpage Designing& Optimization**

- Determined the structure and **design of web pages** based on user requirements and balanced functional & **aesthetic designs**
- Created **features** to enhance **user experience** while ensuring that the Web designs **optimized for smartphones**
- Employed variety of languages such as **HTML and CSS** to write and create **user-friendly web pages**

## Projects

---

**WaterCanApp :** This is a project where the end-user will be able to book watercan. WaterCan is a online service for Buying a water Bottel or can from Any Water Plant to nearby your Location. This application is designed for both web & mobile application. There are multiple section like for customers, suppliers and delivery boys where customers can book watercan and suppliers can add new watercan and delivery boys can deliver that to the booked area.

**Features**

- Location access, Accept order or decline order, GPS, Payment management, Track the quality of your services, reviews, feedback .

**Responsibilites**

- Designed and developed page layouts, custom navigation, animation buttons and icons with Material Ui or Styled Components using Class Components.
- GoogleMap Api or geo location integration for choose customer location.

---

**Admin Dashboard :** (Employee portal).

- Create a Admin Dashboard where as admin can Login and Logout to daily status also applying for leave and You can also see/ Download the paySlip.
- Implimented a messaging system where admin can send text messages.
- used Redux for state managment Redux thunk as Middleware for Asynchronous Api calls.

**Responsibilites**

- Development UI React.
- Responsible for writing code for fetching the attributes data of the application server.
- Used Media Queries and BreakPoints for the design to be compatible in all devices.
- Worked on Cross-Browser compatibility and tested each & every web application on Firefox.opera and chrome Part of a team of about 7, which was responsible for conceptualization.
